

# UPDATE V1.4

## “Social Microblogging PRO”

By Miguel Vasquez

- Fixed bug in Send message
- Limited the number of results to 4 Autocomplete
- Fixed bug in private profiles
- Personalized radios and checkboxes
- Added pagination messages (View more ... messages)
- Added autocomplete on user location with Google Places
- Added filters "Discover page" (Photos, Videos, Music, links or all)
- Fixed overflow error in text, link location in the user's profile
- Added Geolocation publications

### Files Affected

- / **class\_ajax\_request** / classAjax.php
- / **controllers** / pagesController.php
- / **public** / **ajax** / addPost.php
- / **public** / **ajax** / autocomplete.php
- / **public** / **ajax** / get\_message\_id.php
- / **public** / **ajax** / ajax.discover.php
- / **public** / **ajax** / timeline.discover.php
- / **views** / **user** / profile.phtml
- / **views** / **pages** / settings.phtml
- / **views** / **pages** / discover.phtml
- / **views** / **modules** / settingsModule.phtml
- / **views** / **modules** / designModule.php
- / **views** / **modules** / profileModule.php
- / **public** / **js** / functions.js
- / **public** / **js** / discover.timeline.js
- / **public** / **css** / main.css - Line **1574** approximately
- / **languages** / All files, or copy strings from the comment v1.4 - Line **232** approximately
-

## **Files News**

- / **public** / **js** / jquery.geocomplete.js
- / **public** / **js** / jquery.fs.picker.min.js
- / **public** / **css** / jquery.fs.picker.min.css
- / **public** / **css** / jquery.fs.picker-icon.png
- / **public** / **ajax** / load\_more\_message\_id.php

## **IMPORTANT**

Open the file named "**ADD\_GEOLOCATION\_DB.txt**" and executes the code in your database, this is important because it will not work geolocation

**Thanks!**
