InstaMax 2.0 - Embed a Complete Instagram Photo Gallery on your Website - JQuery plugin

Instamax 2.0 will embed all your photos from Instagram account on your website. Any photo that you upload on your Instagram account will automatically be shown with Instamax!

Instamax will help you grow your followers by atleast 10% as tested by some users during a one-month period!

New Features of Instamax 2.0:

1. Displays all photos of the User
2. Grey and White Skins available
3. Works on any device size (responsive + fluid)
4. Improved lightbox popup for images (responsive + fluid)
5. Optimized code overload (minified JS+CSS ~ 50KB)
6. Customize anything with CSS (or send us an Email)

3. White Skin

USAGE:

1. Include plugins

Upload the package to your server (or any hosting platform even Google Drive). Include the plugins as shown below -

```
<!--jquery-->
<script type="text/javascript" src="http://ajax.googleapis.com/ajax/libs/jquery/1/j
<!--instamax-->
<script src="./js/jquery.instamax.min.js"></script>
```

2. Create a container for your interface

Add a div as shown below in you HTML. This div will contain the Instamax widget and display your Instagram photos.

```
<div id="instamax" class="instamax">
</div>
```

3. Call the Instamax plugin

You can directly use the **Generator** to generate the below jQuery call code

Below is the complete documentation of each option.

```
<script type="text/javascript">

$('#instamax').instamax({

  //MANDATORY -----

  //Instagram Client ID (below steps to generate your ID)
  clientId:"b47b34c6e7674aad9bbdbfb2ae2ae000",

  //Any Instagram User URL
  user:'https://instagram.com/google',

  //GENERAL OPTIONS -----

  //Display square thumbnails or rectangular thumbnails
  coverImage: 'http://mywebsite.com/photo.jpg',

  //Instamax Skin - white|grey|none
  skin: 'grey',

  //GRID OPTIONS -----

  //Maximum photos to be displayed in one load
  maxResults:9,

  //Distance between video thumbnails
  innerOffset: 40,

  //Minumum width of video thumbnails
  minItemWidth: 250,

  //Maximum width of video thumbnails
  maxItemWidth : 400,

  //Distance between video thumbnails and plugin conatiner
  outerOffset: 40,

  //Maximum width of the plugin container
  maxContainerWidth: 1000

});

</script>
```

4. How to get the Instagram Client ID

- 1. Login to Instagram Developers website.
- 2. Click on the "Manage Clients" button at the top

- 3. Click on "Register a New Client" button
- 4. Enter your details as shown in the below screen and then click on Register

Application Name:

CodeHandling

Do not use *Instagram*, *IG*, *insta* or *gram* in your app name. Make sure to adhere to the [API Terms of Use](#) and [Brand Guidelines](#).

Description:

Instagram Photos on websites!

Website:

http://buildwithcards.com

OAuth redirect_uri:

http://buildwithcards.com

The redirect_uri specifies where we redirect users after they have chosen whether or not to authenticate your application.

☒ Disable implicit OAuth

Disable the Client-Side (Implicit) OAuth flow for web apps. If you check this option, Instagram will better protect your application by only allowing authorization requests that use the Server-Side (Explicit) OAuth flow. The Server-Side flow is considered more secure.

☒ Disable implicit OAuth

Disable the Client-Side (Implicit) OAuth flow for web apps. If you check this option, Instagram will be only allowing authorization requests that use the Server-Side (Explicit) OAuth flow. The Server-Side See the [Authentication](#) documentation for details.

☐ Enforce signed header

Requires the use of your Client Secret to sign POST and DELETE API requests. Use this option to in requests for the 'X-Insta-Forwarded-For' HTTP header. Eligible requests that do not provide this header fail. This technique helps identify you as the legitimate owner of this OAuth Client. Only enable this See the [Restrict API Requests](#) documentation for details.
