

Please follow these update instructions to update from 1.7x to 1.72

make sure to backup all of your files and your database before updating/replacing
AND don't forget to save the \$config->secretKey

to get more information what the changes are please use something like WinMerge
<http://winmerge.org> to compare your existing version with the new Version - so you could
update "modified by you" files easier.

1. Config changes (just a version number update)

open

```
# config.php
```

and

```
# find line starting with
```

```
$config->version = "1.
```

```
# replace with
```

```
$config->version = "1.72";
```

```
# save, config.php modifications are done
```

2. Please replace the following files

```
charts.data.php
```

```
files.data.php
```

```
files.php
```

```
functions.php
```

```
admin/dashboard.php
```

3. You're finished :)
